How do I get one?

The A2d Toolkit is available at

www.a2d.healthcare

The A2D website introduces the idea of the folder for anyone who might use it, from health and disability professionals, to carers.

There's even an easy-English version.

There are demonstrations of how to assemble a folder as well as sample documents.

You can download all the components from the website and construct your own folder!

Watch a video of the experience of one user and the difference it made to her family.

How do I get more information or assistance?

A2D Admission2 Discharge Together

The A2D Together is a communication tool for people with disability and communication difficulties

Who does it help?

Children, young people and adults

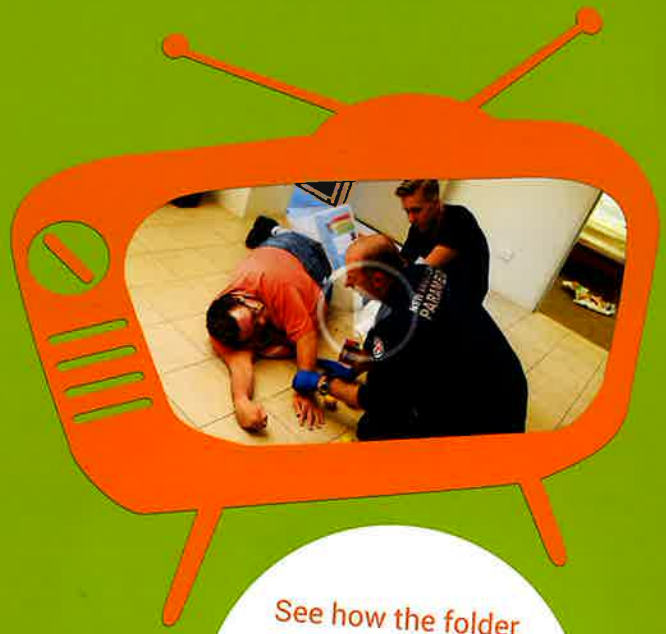
Carers

Disability support workers

Health staff

What is it?

It is a folder with important information about the person to be used when going to hospital or medical appointments.



See how the folder helped group-home resident Bruce navigate the hospital experience after a bad fall at **www.a2d.healthcare**

What is in it?

- Front cover – Contacts/photo
- Medication chart and Webster Pack
- TOP 5 tips for support
- Hospital Support Plan
- Mealtime Management Plan
- Other relevant plans to support the person in hospital

It is **important** that this information stay with the person **at all times.**
