

Swim Safe Communities

Program

This summer, 99 drowning deaths occurred, with over 25% involving individuals from migrant and refugee backgrounds, international students, and visitors.

The Sutherland Shire Council Swim Safe Communities Program aims to engage migrant and Culturally and Linguistically Diverse (CALD) communities in healthy lifestyles. Our qualified staff will provide essential water and beach safety skills, boosting confidence in pools, natural waterways, and beaches.

This FREE program is available to youth (12 to 17 years old), adults and seniors who are from low socioeconomic groups, multicultural communities, or First Nations people.

Keep Safe and Keep Watch

BE PREPARED

BE CLOSE

KEEP FOCUS

Active supervision is essential for keeping swimmers safe, especially children and those who are not very confident in the water.

This means always watching them closely while they are in or near the water, so you can quickly help and respond to any potential danger.
