

Help us better understand your community

Have your say on training and opportunities in your community

TAFE NSW supports communities across the state, and we know every community is different.

We want to better understand what matters in your local area – including your community's needs, challenges and opportunities.

Your feedback will help TAFE NSW shape future training, services and support.

Take the survey

Anyone aged 16 or over can have their say.

We want to hear from people across NSW – from students and families to employers, educators and the wider community.

The survey takes around 5 minutes and asks you about the needs, opportunities and priorities you see in your community.
